bamford

Bamford was born out of a belief that what we put on our body should be as nourishing and nurturing as what we put inside it through our food.

It creates items for the body and home that are inspired by our connection to the earth and a desire to protect its future.

CAROLE BAMFORD

bamford

Bamford rejects the throwaway culture of modern living; we choose to respect nature's resources and ensure they live on for the generations that follow us.

We trace our footsteps: from the environmental impact of the ingredients, fibres, dyes and the water we use, right through to our social responsibility.

Our products are beautifully considered, rich in meaning and quality, with a story we can be proud of.
